Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from Elementary Arithmetic: For Graded and Ungraded Schools The Elementary Arithmetic is intended to cover the work of the first five years. It is divided into four parts. Part One includes the work ordinarily done during the first and second years. Part Two includes the work of the third year. It is devoted mainly to the presentation of the elementary facts and tables of arithmetic. The text-book should be placed in the hands of the pupil when he enters upon the work found in Part Two. Part Three covers the work of the fourth year. Its purpose is to give a mastery of the fundamental operations, and through the study of problems, to develop the ability to use these operations in a practical way. Part Four includes the work of the fifth year. It gives an elementary treatment of Fractions, Decimals, Percentage, Interest, Denominate Numbers, and Practical Measurements. The aim of this course is twofold: first, to give the child mathematical skill; second, to give him mathematical power. To these ends attention is invited to the following: 1. The prominence given to drill intended to give skill, and the frequency of systematic reviews. 2. The Study of Problems intended to give mathematical power. 3. The plan which provides an easy treatment of each subject before the complete treatment of it. 4. The easy steps in gradation. 5. The emphasis given to business arithmetic.
